

Trafinz Contribution to Safety: Highly Commended

Temporary Traffic Management - Kevin Briggs, Downers

Kevin is an experienced and highly skilled Network Control Engineer and Category A/B STMS for the Waikato District Alliance. Kevin's leadership qualities shine through his mentoring and training of crews, contractors and other stakeholders, onsite inspections & audits, and maintaining high traffic management standards.

Committed to innovation, Kevin continuously seeks opportunities to enhance his skills and services. He obtained a NZ Certificate in adult and Tertiary Teaching Level 5 in 2022, using the skills gained to educate and mentor team members with varying capabilities. He collaborates with clients and stakeholders to develop customized traffic management solutions, ensuring consistency and cost savings.

Kevin's extensive research and technical expertise is crucial in implementing proper traffic management practices. He addresses site-specific requirements and collaborates with maintenance teams and contractors to create effective plans. He educates stakeholders on best practices and helps them overcome challenges.

Under Kevin's leadership, internal knowledge and education has improved, resulting in fewer incidents and non-conformance reporting. He actively supports community events by implementing appropriate traffic management measures. His dedication to safety and sustainability extends beyond his professional responsibilities. He will also play a vital role in transitioning our traffic management approach from the Code of Practice for Temporary Traffic Management to the NZ Guide to Traffic Management further enhancing traffic management standards.
