Trafinz Sustainability Merit Award

Pedalling Equity: New Zealand's first Bike Library trial for Intermediate aged students – Nelson City Council

A fantastic transportation sustainability initiative with nationwide repeatability that must be highly commended as grassroots leadership towards a healthy and sustainable transportation future. This trial will motivate others to be innovative in ways to deliver equity for their community.

Encouraging people to get on bikes is great but giving a person a bike enables them to experience what it means to ride and be part of their community.
